# «A» BY AKOUSTIC ARTS

PERSONAL & COMMUNICATIVE SPEAKER

---

## SPOT MY MUSIC !

---

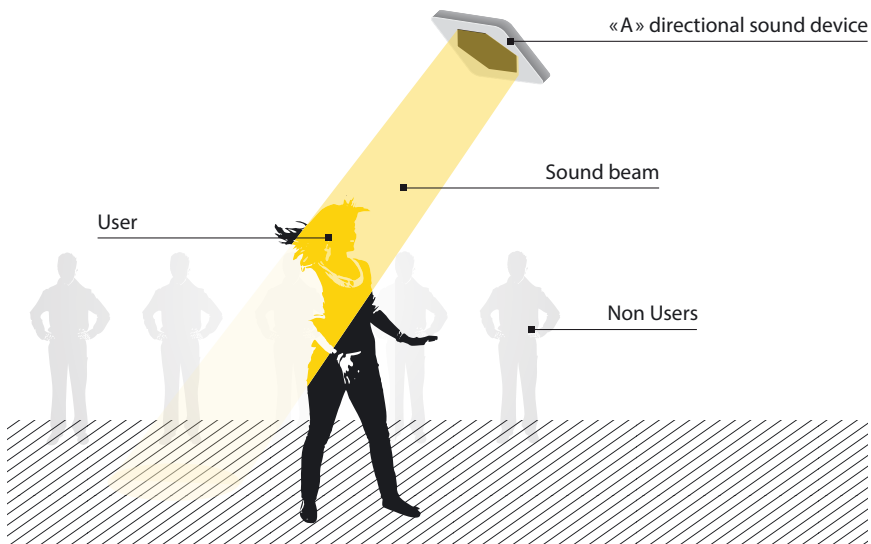

Tablets, laptops, smartphones, social networks... there is a profusion of individual mediums dedicated to personal contents. **Everybody** wants to listen to **his** or **her** music, watch his or her movies, and play his or her game.

However, **one still have to use a headphone to reduce disturbance.**  
But consequently, it keeps you from sharing or communicating.

As an answer, Akoustic Arts introduces **the «A»**, a new sound device that enables you to listen to all your audio contents without bothering nor isolating yourself.

## ◆ THE «A» BY AKOUSTIC ARTS

---

The «A» is a **directional sound device** that creates a conical beam of sound, the same way a laser creates a beam of light to focus on a targeted area. Compact, economical and easy to use, the «A» prevents from sound pollution by bringing sound across long distances.

## ◆ THE «A» ENABLES YOU...

---

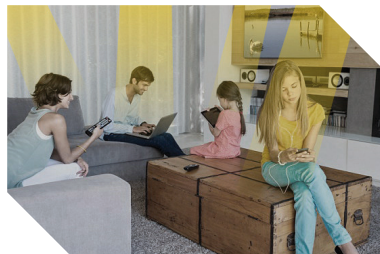

- to create functional areas thanks to sound contents

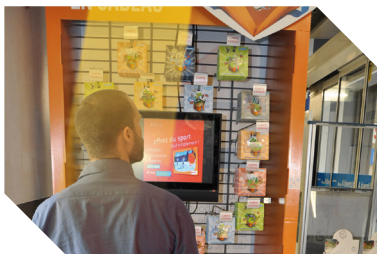

- to give life to works of art

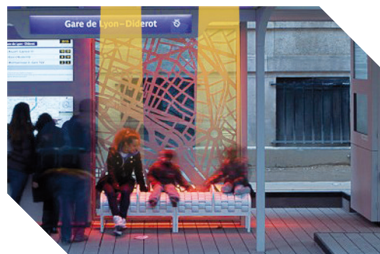

- to get GPS informations silently

- to listen to your personal contents with your family

- to catch your audience

- to listen to an audio information

- to be the only one to wake up

- to chill out with your music
